

## CD 7500 High Speed Digital CD/DVD Printer

The revolutionary CD/DVD/BlueRay printer is a high speed, high capacity UV ink jet printer capable of producing fully variable, high quality images at 2 disks per second. No plates or screens to produce, simply load the disks and image files and the system will automatically print any number of disks, from 1 to 1000's. The printer can be integrated into any CD/DVD/BlueRay work flow, allowing for any level of automation. FotoPoint will work you and your other equipment providers to develop a fully integrated CD/DVD production system.

Jetted white base coating allows for various color effects including white text printing, and metallic appearances.

### Product Specifications

Digital printing process enabling individual or multiple CD, DVD and BlueRay printing

Prints 7500 CD/DVD's per hr, 1,000,000 per month (1 shift)

4 color process plus optional white (CMYKW) CD printer utilizing UV ink set
